PROFESSIONAL SUMMARY

Emerging developer with experience building responsive web applications and user-focused interfaces. Strong foundation in HTML, CSS, JavaScript, React, and modern development workflows, with hands-on experience improving usability, accessibility, and performance through real-world projects. Motivated to contribute to collaborative software teams while continuing to grow technical and design skills.

TECHNICAL SKILLS

Languages:
HTML5, CSS3, JavaScript (ES6+), Python, SQL

Frameworks & Libraries:
React, Bootstrap, Redux, Node.js, Express, Django, MongoDB, Flask, Pandas, Matplotlib

Tools & Platforms:
Git, GitHub, Figma, Adobe Photoshop, Adobe Illustrator, Microsoft Office, Docker, Kubernetes, OpenShift, AWS, Azure, Google Cloud Platform, Microsoft Access, ChatGPT, GitHub Copilot, IBM Watson

Concepts:
Responsive Design, REST APIs, UX/UI Design, Database Design, Version Control, Agile Methodology, SDLC, CI/CD, Serverless Architecture, Microservices, Software Architecture Principles, Cloud-Native Development, Team Collaboration, Leadership

PROJECT EXPERIENCE

Personal Portfolio Website | Figma, HTML, TailwindCSS, React/Vite, Express, MongoDB | 2026

Designed and developed a full-stack, responsive portfolio website to showcase projects, technical skills, UX/UI design work, and blogs/case studies

- Created wireframes and high-fidelity layouts in Figma, defining visual hierarchy and scalable design systems
- Built reusable React components with TailwindCSS and implemented client-side routing with dynamic section navigation
- Developed an Express backend with MongoDB to manage structured content and support future scalability
- Followed production-ready workflows using Git/GitHub for version control and deployment preparation

IBC Traffic Website Redesign | Figma, HTML, CSS, JavaScript, Squarespace | 2024

Led the redesign and rebuild of a commercial website to improve usability, accessibility, and content clarity for a construction company.

- Rebuilt a commercial website using HTML, CSS, JavaScript, and Squarespace, focusing on usability, performance, and accessibility
- Designed Figma layouts and implemented custom code blocks to deliver responsive, user-focused frontend features
- Collaborated with stakeholders to translate business requirements into production-ready UI components

CERTIFICATIONS

- IBM Full Stack Software Developer Professional Certificate | Oct 2025
- Amazon Web Services Cloud Practitioner Certificate | Sep 2025
- Meta Front-End Developer Professional Certificate | Jan 2025
- Google User Experience Design (UXD) Professional Certification | Sep 2024

EDUCATION

Bachelor of Science in Information Science (UX Design Concentration)

University of Tennessee, Knoxville | Graduated May 2025
